New Ore Body Opens to Seven Feet of Shipping Product.

Seven feet of ore which shows values of 80 per cent lead, 30 ounces in silver and \$3.60 in gold was the size yesterday of the latest strike in the Uncle Sam mine.

The strike has been growing rapidly. When General Manager John Dern a week ago released the information that something new had been unearthed in Uncle Sam which looked encouraging, that somewhich looked encouraging, that some

thing new had been unearthed in Uncle Sam which looked encouraging, that something was in the form of 12 inches of pay ore. In drifting upon it since that time it has opened to a face of seven feet of a handsome shipping product.

The discovery is opening an entirely new ore country of rich promise. It is further west than anything that has been opened before and is in a different ore channel from that in which recent operations have been carried on. It was found in a drift which was driven westward from the top of a raise from an old stope in the Humbug workings.

Both of the other ore bodies, in which the Uncle Sam people have been working for some time, are making their usual production, and, if anything, are looking better than ever. The outlook for the mine has never before been so good; the resources in sight and prospective have never been so great. Had a strike like the one just recorded been made two years ago, when the public was in speculative mood, it would have created intense excitement on the stock market and otherwise. In contrast to what would have taken place then, Uncle Sam yesterday sold lower than it had sold for some time before.

OHIO COPPER'S MILL GRINDS CONCENTRATES

The first of the four sections of the Ohio Copper company's new mill is turning out concentrates. It is being run close to capacity, which means that it is handling in the neighborhood of 700 tons of ore a day. It has not, of course, been running long enough to admit of anything definite being ascertained concerning results, but it is doing good work and there is not a doubt of its showing a high saving—around 80 per cent of the values.

NORTH UTAH STRIKE DEVELOPS STRONG

The strike recently made in the Tough Nut section of the North Utah Mining company's Bingham estate is proving to be important. When first encountered, the ore body was about one foot wide. Since that time the drift has been extended 120 feet and the face is now in six feet of ore, which averages 19 per cent lead. The new ore body is entirely independent of anything that has been opened in the Liberal section and the situation is affording Manager W. D. Bohm not a little encouragement.

LITTLE BELL DECLARES CHRISTMAS DIVIDEND

The Little Bell Mining company has sprung upon its shareholders a Christmas surprise in the form of a dividend of 5 cents a share, payable Dec. 22. Books close for transfers on the 18th. The company has for several months been making a good production and it is said that it will have a nice surplus after this initial dividend shall have been paid.

Ore at Samplers.

Ore receipts, by carloads, reported yesterday by the samplers: Taylor-Bunton—Utah, 19. Pioneer—Utah, 3.

SAMUEL R. NEEL & CO., STOCK BROKERS, 525 Newhouse. Bell 3800; Res. 1135-Y.

Ohio Copper's High-Grade Drifting in Progress From Ajax Veins Will Swell Company's Profits.

Some of these days the public will years has been that attracted by its reputation as the pioneer producer of low-grade porphyry ore. Its future has been judged by the cold figures which describe the great low-grade ore bodies of the Utah Copper, Boston Consolidat-ed and Ohio Copper: While the wealth

or about 50 cents a ton better than origal estimates called for. With a pro action of 3,000 tons a day, that inrease, it will be seen, is of not a little

nportance. That similar surprises are in store for Itah Copper and Boston Consolidated vill not be doubted. Utah Consolidated already has one in the form of an entirely new ore body on its lowest level, which occasionally gives startling assays. Like results await further developments in the Yampa, in the large Strong improvement in the shaft of estate of the Utah Metals company, in

Shaft—Grand Central to Pay Dividend.

The Golden Chain Mining company has awaken to the fact that Bingham is in taken complete charge of the Ajax workits infancy as a mining camp. The attention which it has drawn the last few conducting active operations. Drifting for the Golden Chain ground is in progress on the 300-foot level, aside from de velopment work in the lower levels of the Ajax shaft, which is 1,100 feet deep. The Ajax property was purchased on

the Ajax property was purchased on the basis of \$80,000 valuation, or 35 cents a share for the issued stock of the Ajax company. Holders of Ajax stock have the option of taking cash at that rate or stock of the Golden Chain company share for share. As to the outlook for the Golden Chain, Manager C. E. Loose, who was in the city yesterday from Provo, spoke characteristically. "That its estate is on the Grand Central-That its estate is on the Grand Central-"That its estate is on the Grand Central-Mammoth ore zone is pretty well established," he said; "the ground shows it. Nearly everyone knows what the possibilities of that zone are, at depth. The people who are backing Golden Chain have put their money in it; that's the best argument I know of that they believe in it."

Grand Central will undoubtedly pay a

lieve in it."
Grand Central will undoubtedly pay a dividend in December, Colonel Loose said further. "The stockholders rather look for something of that kind at Christmas time," he explained. "I can't say that it will mark the resumption of regular dividend payments by the company. But developments at the mine are progressing satisfactorily. Grand Central will be paying dividends regularly later on if not now."

The ore continues to show up well on the 450-foot level of the Sioux Consoli-dated mine, the colonel said. The ore is not so high grade as the best of that on the 400 level, but it is shipping grade and there appears to be a great deal of it. ORES AND BULLION.

Smelter settlements yesterday, reported by McCornick & Co.: Ores, \$10,000; bullion, \$50,000. Total for the week, \$760,000.

Third Mill for Gold Circle Camp Nears Completion at Rex Mine.

Both custom mills of the Gold Circle district are at the present time running on ore from the lease on the Ripsaw group, where is an unusual showing of high-grade milling ore, according to advices received yesterday by S. M. Levy, manager of the Gold Circle Crown Mining company. The leasers are working in three and a half feet of ore, it is said, which averages \$20 a ton

as it is broken down. The Rex mine continues to have the big showing of the camp—an ore body from three feet to fifteen feet wide, which has been opened 445 feet on the 150-foot level. The ore is all high-grade milling. The Rex people are just completing their mill and will soon be producing upon a relatively large scale.

The Cornish lease on the Gold Circle Crown is sacking ore which runs as high as \$480 a ton in gold. The Jardine tunnel, in the Nevada Gold Circle, has a face of five feet of low-grade ore.

The camp is looking better than it has ever looked before, it is said, and with three mills in operation it will soon be realized that it is a producing

camp of some importance. PIOCHE KING LEADER OF UNLISTED ISSUES

Mining Notes.

Samuel Newhouse left yesterday for Europe, in response to a cablegram advising him that the condition of his brother, Mott Newhouse, is very much worse. Mr. Newhouse goes to Europat this time prepared for an indefinite stay, it being likely that his services will be required there for several months to look after his brother's affairs.

A two-foot body of low grade silvercopper ore has been encountered on the
200-foot level of the Grutli mine, in East
Tintic. The importance of the find is enhanced by the ore being overlaid with a
large body of lead-stained tale. It has
been determined to sink to the 300-foot been determined to sain to the level to drift under the new ore body, the 200 level being apparently at its apex.

If there's some needed thing you're waiting to buy at a bargain, you have a direct object in reading the ads. If it's a reason-able want, want advertising will
